BEST PRACTICES (I)

1. Title: "Restructuring of College Website"

2. Objectives:

i) Having a website which is informative.

ii) Create an Online presence.

iii) Cultivate relationship by engaging students, teachers etc.

3. The Context:

To clearly set our goals needed from the website. Building a user friendly and high performing web application and encapsulating the reactions, perceptions, and feelings that users experience.

4. The Practice:

It is the process of continuously improving the usability of the website to meet and exceed user's expectations. To create an information structure that supports institution goals, information security, etc.

5. Evidence of Success:

We expect creating online presence, easy information exchange, creating credibility, cost cutting, users' insights and advertising expansion.

6. Problems Encountered and Resources Required:

Resource crunch and lack of technical know-how.
